Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is not clear in the phrases, "on the basis of" and "in a viscosity promoter amount"

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP

000618259A2.

4. The reference discloses a thermoplastic elastomer comprising 10-90 wt% of syndiotactic polypropylene and 90-10 wt% of ethylene propylene non-conjugated diene copolymer rubber or ethylene propylene copolymer rubber that has been partially crosslinked, preferably with peroxides and using a crosslinking aid. The compositions may additionally include up to 50% by weight of other resins such as isotactic polypropylene, and up to 5 % by wt. of fillers such as talc and calcium carbonate. A lubricant may be included as well. The inventor does not disclose specific lubricants. However it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to employ a conventional lubricant such as mineral oil. The

compositions may be prepared by mixing the components, (with the exception of the cross linking agent), in a conventional mixture such as a Henschel, Banbury mixer or twin screw extruder until molten with subsequent addition of the crosslinking agent and aid. The compositions are useful for formulating rubber components for automobiles. See page 1 through page 5, line 25.

5.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 000618259A2.

8. The reference is described above. No patentable difference is ascertained between the present and patented inventions.
